

Inspiring change...

It currently costs Creative Football **£130k** to operate over **12 months** supporting up to **350 people a week**.

We know it can roughly cost the **NHS** in the region of **£300k** to treat **one** in-patient at a Psychiatric facility over **12 months**.

- Who are we?
- What is our approach?
- Why does it work?
- Where do we go from here?

“

Those of us who are **mental health professionals** need to...hand over control to **service users** and **communities** by fostering **community development** and **inclusion**. Only by doing this do we stand a chance of **reducing** the **exclusion** that both **increases** the likelihood of **serious mental health problems** and **decreases** the likelihood of those with such **difficulties, living well** and **prospering**

(Perkins, 2008)
